CGPA - 8.5 / 10

ROSHAN JHA

FRONT END WEB DEVELOPER

SKILLS

PROJECTS

VEHICLE RESALE PRICE ESTIMATOR

- Worked on the Front End part of the project.
- Enhanced the website with the animation ,flexboxes in CSS.
- Used Machine Learning algorithm Random Forest Regressor to predict the prices of the used car.
- Used Python Libraries like Pandas , Numpy , Matplotlib , Sklearn to analyze and visualization of the dataset .

RESTAURANT SEARCH APP

- Front End is done with React.
- Based on the user search , a Yelp Fusion API is called and the Restaurant near user location are listed based on the Cost Effective , Bit Pricer and Big Spender with user reviews.

MEDICAL INVENTORY WEBSITE

- For front end part , HTML , CSS and Bootstrap with Javascript is used.
- Node.js is used for the Backend purpose and the database used to worked with is PostgreSQL.
- Idea is to list all the medicines stocks available.
